

Come Fly With Me Start-up Procedures FSX Only

Step	Procedure	Note
1	Check IP Address and confirm with Router settings under application and gaming. (see: Notes)	Click start button. Type {cmd} and press enter. Type {ipconfig} and confirm IPv4 address i.e. 192.168.1.103 write down the IP address and open the Web Browser and type your router address i.e. 192.168.*.* and type in the password for your router. Confirm the IP address under application and gaming and update if necessary. Also check port settings are set properly as shown on bottom of page 2. Once completed continue to step 2.
If 2	Launch flight simulator X. Load flight using the ICAO for the departure and destination Airports.	i.e. CCZ4-CDW2
3	Under View, Options, Settings, Display, Traffic tab - set airline and general aviation slide bars to Zero, also under Aircraft Labels be sure to turn on <u>tail numbers</u> to see the other player's names.	Also calibrate both the yoke and pedals (if needed).
4	Set the weather to real world weather.	Under the heading in the task bar, select World, Weather, then click on "real world weather (Update every 15 minutes)" and press OK, and when update completes press OK again.
5	Do not use the full screen view when using "come fly with me"	Press Alt key if in full screen. Under views make sure full screen is not checked. If the new FS window is in Maximized view, click the center button in the upper right hand corner to reduce the FS window.
6	Ensure that Windows speech recognition is on and in the listen mode.	Under Control Panel and under Speech recognition, Start Speech recognition, or, if the icon is in the taskbar, right click the icon and click "listen to everything I say".
7	Start the "It's Your Plane program".	Wait until you hear "Captain it's your plane, we're ready to go". Say "Reset the time to Zulu".

8	Start Team Speak 2 by saying "Connect to come fly with me".	Wait until you hear "what channel will we be using".
9	Say what channel you wish to use. i.e. ("channel two")	Channel 1-16, (if joining a flight, use the channel indicated in Team Speak 2 panel or flight tracker under the heading CH) you will also be given a pass code i.e."679" that you will have to enter in FSHost Client window.
10	Start FSHost Client by pressing the FSHost Client shortcut (that you created) then press run.	Ensure that the IP address is 69.31.164.194 and the pilot number/name is correct.
11	Press the "Search IP for Sessions" button	Once the come fly with me session appears enter the pass word at the bottom.
12	Enter the pass word i.e. (679).	
13	Press the "Connect" button.	
14	Once connected, minimize all panels. (except FS)	Maximize the FS window by pressing the middle button in the upper right corner. You should still see the toolbar on top and the taskbar below.
15	When finished flying say "Disconnect from Come Fly With Me" and follow the directions.
